Community Based Monitoring Library

Here you can find information about Arctic community based monitoring programs, including the manuals they use and an overview over the most important lessons learned.

The materials have been prepared by the organizers of each community based monitoring program.

Not only gathering data for researchers

Community-based monitoring should:

- Make sure that communication reaches decision-makers and leads to better management
- Give users a 'voice' to express how they see the challenges
- Raise environmental awareness among users

The PISUNA-net Observation Database is a collaboration between the Greenland Min Web site is hosted by the National Snow and Ice Data Center.

Version 1.3.1
Rails version: 4.1.16, Rails environment: staging

Observation ID: KANKR160301_4
Recorder: pisuna admin
Coordinator: Edvard I. Kristiansen (Kangersuatsiaq)
Date: 2016-03
Observation area: Kangersuatsiaq

Observation Details

[Back to search results](#)

Total trips: 30
Quantity caught: 0
Trend: Increasing

Comment:

Increasing numbers are observed and most are of medium size. There are only few large individuals

Importance

Long lines for Atlantic Cods are now placed for no longer than one hour as there are so many Atlantic Cods

Suggested Action

We recommend that the Atlantic Cod surveys carried out up here in the north, also near Kangersuatsiaq, to also clarify the options here.
