Note: The Norwegian Coast Guard vessel Svalbard will be at sea right outside of the city of Bergen, but a back up plan for conducting the visit pier side at Haakonsvern Naval Base can be executed at short notice if required. The back up plan is due to remaining work and certification of newly installed equipment that might affect the sailing program next week. If a change in plan is required, you will be notified the day in advance. The program will be the same, and start and end at the same times, but with a 20 minute car transport at 0930 and 1200 in stead of a boat transfer.
