# Interdisciplinary Science Dissemination

EGU Session April 2019 Vienna, Austria:

***“Evaluation, exploitation and enhancement of Arctic observing systems across disciplines”***

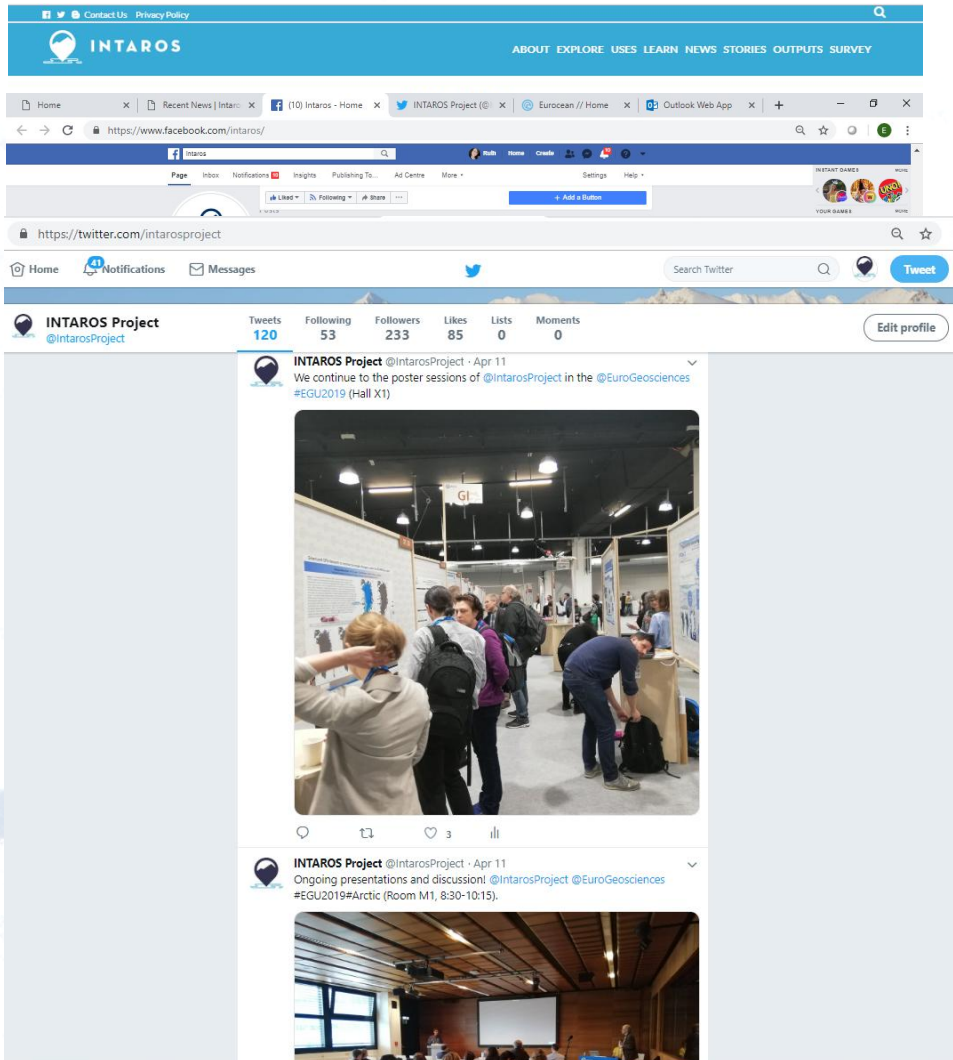

We offered two scholarships. One candidate, Zeinab Jeddi, successfully completed the application, was awarded the grant (and Sheffield processed her reimbursement). One applicant withdrew.

Sheffield circulated information about session organization at AGU2019 (general assembly and Ocean assembly) - not much interest this time

Journal special issue: We started contacting some journals to enquire about special issues, we will circulate soon some possibilities
